

Information from Axess Logistics to our customers regarding production and transport capacity in December 2024

Dear customer

At Axess Logistics, we would like to inform you about our production and transport planning for December 2024, taking into account the public holidays and the reduced capacity that follows. At a time when the demand for our services is high, it is important that we ensure all aspects of our operations function efficiently together.

Production capacity PDI/Terminal:

During the last 1 ½ week of December, we will only have three days of production (23/12, 27/12 and 30/12) and those days with limited capacity because of vacations. This reduction in our capacity may affect our delivery times, and we want to be transparent with you about this situation. Our production is scheduled to return to normal levels in January 2025, and we are doing our utmost to manage this transition as smoothly as possible.

Transport capacity:

The transport capacity in week 52 will be limited due to cancelled train services and holiday vacations. The same will apply for week 1. This means we can expect reduced transport capacity during these weeks, and we therefore recommend that you plan your logistics well in advance. To ensure that we can meet your needs, it is important that you place your orders as early as possible.

The importance of early planning:

We want to emphasize the importance of submitting your vehicles and orders as early as possible. Early planning and ordering are crucial for us to ensure that your needs are met and to avoid potential delivery delays. The earlier we receive your orders, the better we can manage capacity and ensure that everything runs as planned. We know that the market will push vehicles to be delivered before end of the year. To be able to succeed we recommend that the volumes arrive Norway latest week 49.

We appreciate your cooperation and understanding during this period. Together, we can overcome these challenges and continue to provide high-quality services to our customers.

If you have any questions or need more information, please do not hesitate to contact your Key Account Manager or our customer support team. We are here to help you.

Best regards,
André Joteig
